

Structures To Last For Centuries

IS RE-CONSTITUTED

MEDICAL BUILDING

MAIN BUILDING

The natural science building has been constructed with a view primarily to utility. The building accommodates five large departments, namely, Chemistry, Physics, Zoology, Botany and Geology. Each department has the maximum number of student and research laboratories. Two amphitheatres for lectures and demonstrations, a museum for speci-

THESE are views of various buildings which go to make up the University of Western Ontario at London, which is interestingly dealt with in the accompanying article. In the centre is the beautiful and stately main building, which will open at the beginning of the fall term. The picture gives a good view of the magnificent tower. At the upper left is the Science Building, and at the upper right the Medical Building. At the lower left is the beautiful entrance to the main building, and on the right at the bottom is the new bridge which leads to the new buildings, which are situated on the other side of the River Thames.

is the beautiful entrance to the main building, and on the right at the bottom is the new bridge which leads to the new buildings, which are situated on the other side of the River Thames.
